Always Active—Does Not Dry Out!

- Fluid Film leaves a wet, non-drying film that cuts off oxygen to the surface providing long term protection to all metals and tack free lubrication to moving parts.
- Fluid Film resists water wash-off (not water soluble) and is not affected by moisture or humidity.
- Fluid Film's unique molecular structure stops the highly corrosive effects of fertilizers on all metals!
- Being lanolin based and containing no Solvents, Fluid Film will not burn greenery, evaporate or freeze, will not harm paint, plastics.

Wherever you need it, Honda has the power to keep you going!

For optimum performance and safety, we recommend you read the owner's manual before operating your Honda Power Equipment. Connection of a generator to house power requires a transfer device to avoid possible injury to power company personnel. Consult a qualified Electrician.
